RELEASED IN PART

September 16-17 Nuclear Suppliers" Neeting

In the third round of nuclear supplier discussions in London, agreement in principle was reached on many of the provisions under consideration for nuclear suppliers understandings. However, remaining differences on the extent of safeguards coverage to be required as a condition for nuclear exports precluded the adoption of a complete set of common guidelines at this meeting. The divocated safeguards on the entire fuel (ycle of the extent and refused to compromise with the who, with support, favor safeguards tied only to plied items.

The UK (FCO Asst. Undersecretary John Thomson) will take the lead in trying to maintain the momentum of this activity to work out a compromise in the course of bilaterals. Specific dates have not yet been set for the next meeting, but Thomson hopes to schedule another multilateral session in late October or sarly November: The tone of this September meeting remained constructive, and I am therefore optimistic that a consensus can be reached this fall. I will stay in touch informally with the three major countries, and consider more formal US approaches at a later stage if and when these could serve to ensure a proper resolution.

#### Agreed Principles

A copy of the revised guidelines paper resulting from this meeting is at Attachment 1: those items still at issue are indicated by brackets. Agreement in principle was reached on a large number of points; these are analyzed at Attachment 2.

.

SFCRET/SFTST

### Iters Still at Issue ...

The key area where major differences still exist, as indicated above, concerns the safeguard correitments to be required of recipients as a condition of supply.

From the outset of this effort the ave 1.4(D) said that as a matter of principle they count t require any recipient to place his entire fust recle. which might include facilities not dependent on assistance, under safequards as a condition of supply. Assistance, under safequards as a condition of supply. They regard this as a de facto MPT requirement, and hence unacceptable. The and for a provision, sithough have nevertheless supported in a provision, sithough i cautioned all three that i fid not believe the were prepared to move on this issue.

The were in fact not prepared to accept comprehensive safeguards as a requirement. They did indicate, however, that they recognized the value of comprehensive safeguards in facilitating peaceful supply, and therefore (a) they would not hinder efforts by other suppliers outside the context of supplier inderstandings to induce SMMS to accept comprehensive safeguards voluntarily, and (b) they would not block a nove in the IAFA to develop a new model safeguards to accept for applying comprehensive safeguards to agreement for applying comprehensive safeguards to opposed a comprehensive safeguards to although they would favor a formulation setting full safeguards as an objective.

Fut the \_\_\_\_\_\_ insisted on making corprehensive 1.4(D) mafequards a condition of nuclear supply, and were under instructions from \_\_\_\_\_\_bt to compromise on this issue at this meeting. The meeting despite a number of attempts by the \_\_\_\_\_to achieve a compromise, ended in an impasse on thi \_\_\_\_\_ter.

3

Two other issues remain unresolved at present: (1) whether reactor technology as well as more sensitive technologies should be safeguarded to proclude unsafe-guarded replication of imported reactors, and (2) supplier consent for the reprocessing, storage, alteration or use of weapons usable material supplied or derived from supplied items. Novement on these issues must probably avait some resolution of the basic await some resolution of the basic disagroement on safeguards coverage

#### Next Steps.

1

1. 45

2.4

1.4(D) to be realistic, and plan to stay in close touch with all delegations over the next few weeks as the key countries conduct internal reviews and bilateral discussions aimed I have urged the at achieving an informal compromise.

I think that the differences of views can be a clearer picture of what can real biy be achieve as a result of their recent experience in \_\_\_\_\_\_\_ - ach leved Both the governments = the ì,

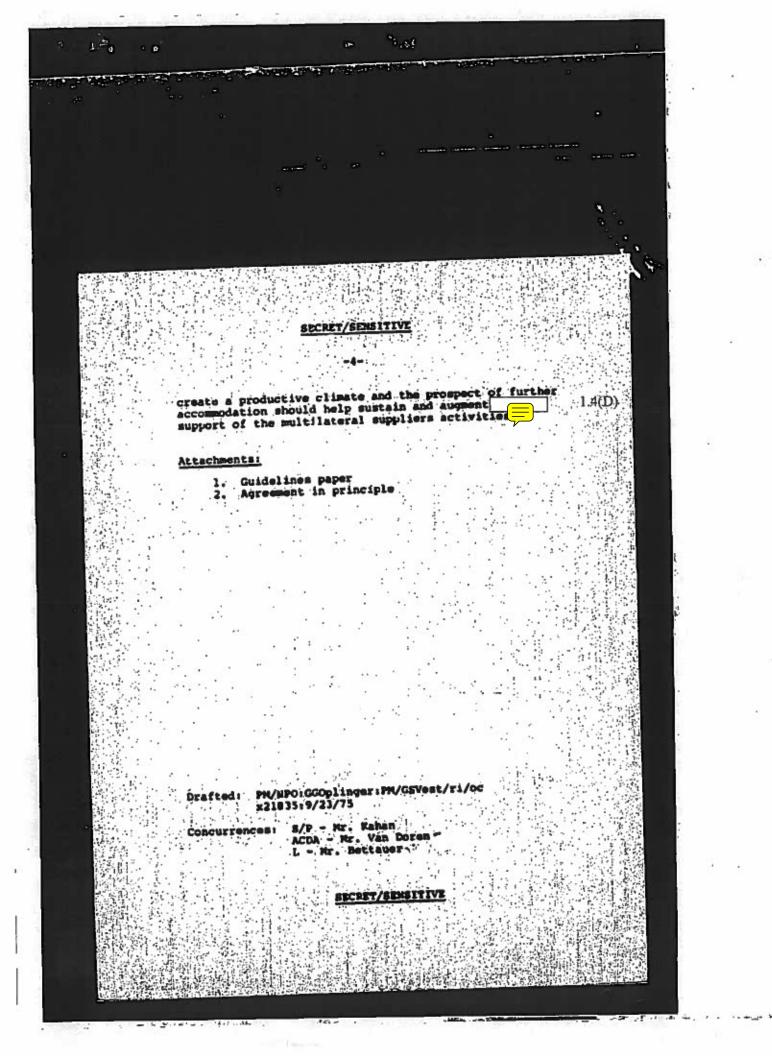

If, on the other hand, after review of its position at the Ministerial level. Franking rigid on the full fuel cycle concepter may need to approach the set of achieving a consensua our views on the imperate of achieving a consensua our views on the imperate of achieving a consensua our remaining issues at the next meeting. We may possibly need to consider also a political approach to the productive of achieving a productive -(= outcome.

The \_\_\_\_\_\_ maintained a constructive attitude during the continue mosting, and I as reasonably confident that \_\_\_\_\_\_ will retain this stance and 1.1 continue to work \_\_\_\_\_ hin the multilateral framework to achieve a proportive outcome. Our efforts to respond positively to bilateral requests on COCOM and reactor lice my have undoubtedly helped

## NCLASSIFIED ALTERNATIVE APPROACHES TO SAFEGUARDS

Explanatory note:-The wain difference is that para 4 (First Approach) provides for a uniform system of IAEA safeguards on the full fuel cycle with an understanding that all we bers of the IAFA would be encouraged to accept such a system thereas paragraph 4 (Second Approach) is based on the application of saleguards only to items of equipment or technology, on an agreed trigger list, which are actually supplied. The remaining paragraphs are comen to both approaches although in some cases their precise forwlation could depend both on which of the t.o Appronches is chosen and on the exact contents of the agreed tripper list.

si.

and the second second

4. FIRST APPROACH

Suppliers would agree to transfer items on the trigger list only to countries thich accepted a uniform system of IAEA safeguards on their full fuel cycle. The system would be based on existing experience and acthods and would include provision for re-transfer of iteus on the trigger list only to nations accepting the IAEA full fuel cycle saleguards and with the consent of the original suppliers.

### SECOLD APPROACH

a) Suppliers would arree to transfer trigger list items only upon covered by IARA sateguards, with duration and coverage provisions in conformance with the GOV/1621 mildelines.

Excentions. muld be made only after consultation with the parties /Б. to this understanding.7

#### ERRATUNI.

Add following to the beginning of explanatory note on. page 21

Alternative schemes have been suggested. They

are set out below as paragraph 4 (first Approach) and paragnaph 4 (Second Approach).
