Before anything, I want to say, although my native country was not CHILE, my country, my homeland, yes, it's Chile, and it's there where I want to go when I'm old, and if it's necessary I'm willing to die for it. Having said that and affirmed my reasons and my loyalty to the homeland that you perhaps, more than anybody else, should recognize. I want to point out some errors committed in the past which have lead to the current situation, plus the errors which have been committed in the last few days, and some which are currently being committed.

1- Another country should not have been used for the Letelier operative, if for no other reason than the knowledge, or the supposition which was given to the other country, using its documents, and the position of blackmail in which we could have fallen, and secondly, by the infiltration that the other country could have had.

- Once the visas were denied by the U.S., the operation should have been cancelled totally, with the understanding that the C.I.A. had knowledge of the persons involved in the operative.

I accept that there are things to do and it's better not to inform higher ups. But in my judgement, the physical elimination abroad, with all its risks and possible consequences, especially in the U.S., where there is perhaps, the best police force in the world, is not one of them.

A scheme was set by sending two officers to the U.S. using official passports, duplicating the names of (in) Paraguay, and this hasn't been used!. The basic error of this scheme was not knowing that the U.S. consulate doesn't keep photographs of persons who get visas in official passports. So, the gringos came over confident looking for W. and R., supposedly from the Paraguayan photographs.

- 5- In my judgement the greatest error has been not informing his Excellency, the truth and real magnitude of this problem. Without this, his Excellency was unable to act or give someone the necessary authority to act, and this has brought about the following results:
 - a) Lack of control over the press. Results:
 - 1- Publication of photographs.
 - 2- Identification of myself, with the danger that this can reach an international level, and that someone in Europe or Mexico could recognize me. etc, etc, plus the shame and loss of prestige that I can cause my nation due to my past activities,
 - b) The funds that the Cubans need to leave the U.S. cannot be collected beyond the reach of the F.B.I. and the Federal Grand Jury. (Note: The term of the Grand Jury expires this month and they will either indict DIONISIO SUAREZ, or set him free. At the moment that he (Suarez) is free the F.B.I. will not see him anymore, and he together with his comrades will be perfectly capable in adjudicating themselves, publicly, together with us, the death of Letelier.

In conclusion, the public opinion already believes that they did it and they don't have anything to lose. One thing is to say it and another thing is to prove it).

- c) The impossibility of justifying the presentation of the two captains, the real W. and R., to effectively stop the request. (If the scheme was not going to be used, why were W.and R. registered in the U.S., knowing that it would cause a lot of suspicion, because of the similarity of the names and especially the photographs, since the only ones the gringos had were from the Paraguayans.
- 6) To think that it could be denied, that the Paraguayan photographs are of Fernandez and myself, is self deceit, which nobody is going to swallow. The only way to remove this problem from our back, is for the F.B.I. to admit that it committed a mistake and that the "officers" who travelled to the U.S. with Chilean official passports, are not the same ones.

Nevertheless, I understand the reasons for which you haven't let his Excellency know the truth about this case, and I agree that your presence is indispensable to protect the institutionality of the current process. But if things are the same, the Government is going to fall because of not knowing how to confront the facts in an adequate way. So, I support:

- 1- That if his Excellency is presented with the truth , it is possible and probable that you will be removed from every position, where the Government can be protected.
- 2- The way that this problem has gone and is going, the Government will fall beyond help as a result of the F.B.I. discovering the truth, by the anger of the Cubans, by the U.S. breaking relations, by the opposition group here discovering the truth, etc, etc. (There are not enough fingers to cover the holes that the dike has).

So, I ask you:

- I- To tell his Excellency the truth of this situation, so that he can use his authority as he can.
- 2- To request of his Excellency the \$25,000.00 that GUILLERMO NOVO and his people need to leave the U.S..
- 3- To present the two captains upon request and to cash in on the scheme, which was done and thus neutralize the only real weapon that the gringos have at this moment.
- 4- To request the application of a decree to control the press and put an end to the speculations and conclusions that they are launching.

The Chine of the

I ask for your understanding, what I am requesting is not for my own benefit or my family's, but it is my opinion and the opinion of many others on what to do, so that the Government has the opportunity to survive. The problem in controlling the other internal group is not as important as the satisfactory resolution of the LETELIER problem.

With regards,

J. Andres Wilson S.
