# Threat Assessment

- ➔ A UBL attack against US interests could occur at any time or any place
- ➔ It is unlikely that the CIA will have prior warning about the time or place of a UBL attack

# Threat Assessment

➔ We are concerned

[Redacted]

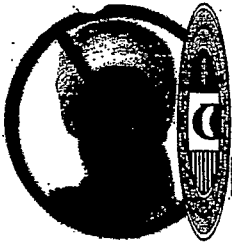

that an

attack could be in the final stages.

[Redacted]

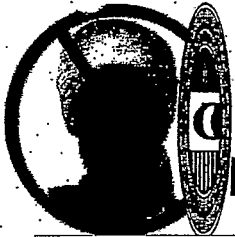

➔ Once UBL's approval is given, his organization could launch attacks with no additional warning.

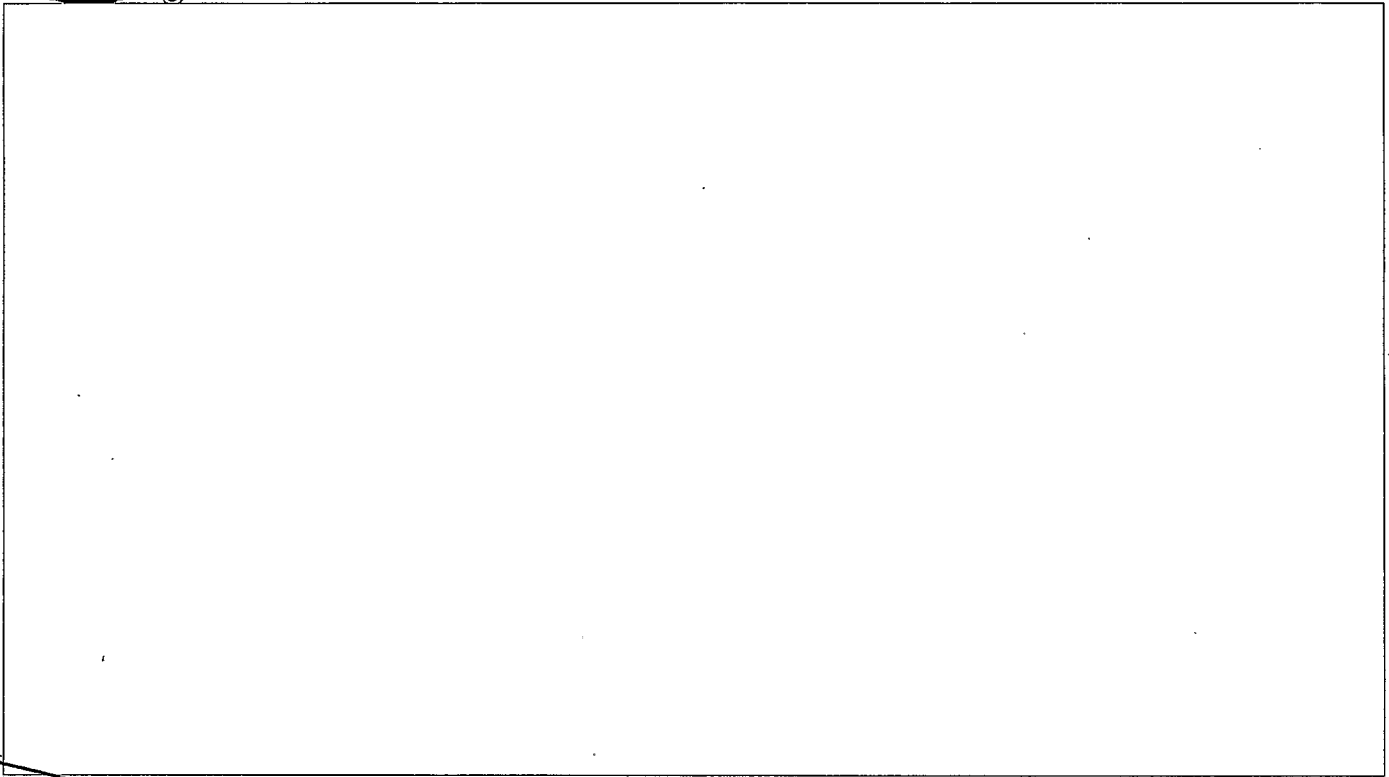

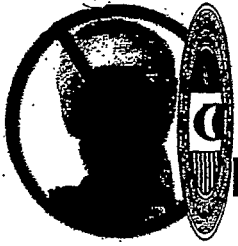

# Threat Assessment

- ➔ **7 August** - Anniversary of the Africa Bombings
- ➔ **20 August** - Anniversary of the retaliatory missile strike against UBL camps
- ➔ UBL has not shown any interest in marking anniversaries, especially using a Christian calendar, but he understands the "propaganda" value of attacking on the same date.
