EXERCISE EXERCISE

MIGHTY DERRINGER

EXERCISE EXERCISE

0100 December 8, 1986

Damage Limitation Containment Implementation

The placement of the device in the cooling tower at the north site for the Mighty Derringer event presents a formidable problem and one for which solutions are not readily available. A solution has been achieved which involves many elements not previously exercised but one with which all parties involved feel reasonably comfortable.

(b) (1), (b) (3)

Many of the required resources for this system are already on hand and there are no known problems with material that will interfere with the time lines which are proposed.
