AGGREGATE ASSESSMENT--ONE HOUR--OF THREAT MESSAGE AND SKETCH

TECHNICAL, BEHAVIORAL & OPERATIONAL ASSESSMENTS:

With a high degree of confidence, we conclude that the threat is for real. The drawing accompanying the threat message illustrates a geometry which, as far as experimental measurements done in Montrev are concerned, is essentially identical to the Montrev device. We believe the Montrev device to be capable of nuclear yield.

INTELLIGENCE SUMMARY:

1555 - FBI Intell Summary received from assessments, and Eddy noticed that there were inconsistencies with our known information. The most significant item is a listing similar to the one on the US map recovered from Rosita's trash, but with the addition of a line between the Indianapolis and New York lines that says "412-742-0830, Pittsburgh, Pennsylvania, 12/10-12/86." FBI was immediately queried about the discrepancy. Also, the report said that the map was found in the Jumping Bean Motel on the outskirts of Tequila.

1745 - The following questions were asked of the FBI: 1) Re: Diaries found in Mahmoud Zulfis (a Nuclear Engineering Student) apartment after he was arrested by FBI in LA, CA 12-06-86. What are the analysis of contents of these diaries?

5) Re: We have also requested clarification from Bill Nelson (a controller who is working on the question). What about the inject, earlier in exercise that the terrorists were aware of the fact that they were under surveillance or were they not aware of the surveillance? The answer from the controllers will affect certain theories proposed by intelligence/assessment teams.

1920 - Secure call from NVO Commo. They have an important intell message that they have been trying to send but the fax here has been

The two grabbed some commo gear, ran into the Hearest (Herst?) building, and took the inhabitants as hostages. Cdr Ali was ID'd by local police as he ran to the building. The FBI has surrounded the building and is presumed the negotiations are imminent. No further activity expected to happen until morning.
